

FLOORING SYSTEMS FOR INDUSTRIAL SPACES

INDUSTRIAL FLOORING BY FLOORING SOLUTIONS

Flooring Solutions offers high-performance industrial surfaces specially designed for their respective industries, offering the best in safety and performance.

MANUFACTURING

The manufacturing industry is one of the world's busiest fields. Their facilities are high-traffic areas that require a strong surface that can withstand daily operations.

Ultrasil LI

If you are looking for a dense, sealed, and dustproof flooring surface, Ultrasil LI is one of the top options available. It creates a surface that never peels and that is very easy to maintain.

Ultraguard

The Ultraguard makes use of a water-based polymeric protectant that makes the flooring very easy to maintain. It also gives it high durability and stain resistance.

AUTOMOTIVE

The automotive industry has become one of the largest and most profitable across the world, with millions of vehicles being constructed on a yearly basis.

Flowcoat HS

This high-performance industrial flooring surface is solvent-free. It is known for its durability, seamless quality, and finishes that provide solid visual impact.

Flowcoat HTS

The Flowcoat HTS is an industrial flooring surface that has high abrasion resistance, strong chemical resistance, and UV resistance.

Euco Diamond Hard

The Euco Diamond Hard is a LEED-certified industrial flooring surface. It creates a dustproof and liquid-resistant surface that can also minimize tire marks present.

AVAILABLE COLORS:

ELECTRONIC

The electronics industry deals with a multitude of high voltage items and equipment that must be handled with extreme care during the whole process.

Flowshield ESD

The Flowshield ESD is a self-smoothing floor surface that has antistatic qualities. It can ensure that your facilities are protected from electrical discharges.

AVAILABLE COLORS:

COLD STORAGE

Cold storage in the food and beverage industry is crucial to keep different products fresh and fit for distribution after being produced and packed.

Flowfresh RT

The Flowfresh RT is the ideal fit for cold storage facilities. It has antimicrobial features that ensure your food and beverages are kept clean and fresh.

AVAILABLE COLORS:

PHARMACEUTICAL FOOD AND BEVERAGE

Like other industries, the pharmaceutical, food, and beverage industries handle a number of dangerous and volatile substances with care and high precision.

Flowshield SL

A seamless, hygienic, and chemically resistant flooring surface, the Flowshield SL is ideal for areas where cleanliness is a high priority.

AVAILABLE COLORS:

KEY TAKEAWAY

Industrial spaces are high-activity areas that require a surface that is strong, sustainable, and hygienic. By choosing these industrial flooring systems from Flooring Solutions, you can ensure you are getting the best surfaces available.
